

Clothes, fashion, climate change.

It's estimated 1/3 of clothes in UK wardrobes haven't been worn in the last year!

Organically grown cotton creates over 40% fewer carbon emissions – it supports healthier soils, avoids pesticides and fertilizers, and uses 90% less water!

This [TED-ed talk](#) 'lifecycle of a T-shirt' explains how T-shirts are made, and their impact on our environment.

In the Lion, the Witch and the Wardrobe ...

... four children found a whole new world at the back of their wardrobe!

Rummage into the deepest, darkest corners of your cupboard or drawers ... and see what you can find.

Help tackle climate change - avoid buying new clothes! If it still fits - great!! If there's a tear or a stain - can you mend it, patch it or even tie-dye it? If it's too small, pass it on - to a cousin, neighbour, friend?

When you've completed this challenge ... Remember to hit the red button!
